CHATBOT

A chatbot is like a virtual buddy you can talk to. It's a computer program designed to simulate conversation with human users, typically through text or voice interactions.
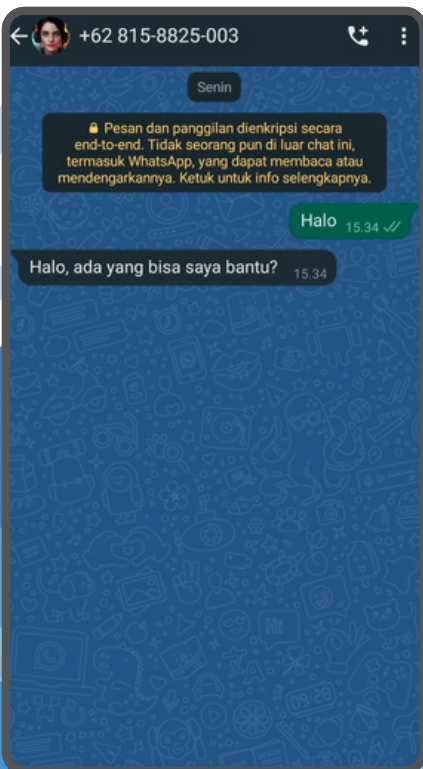

Our Services
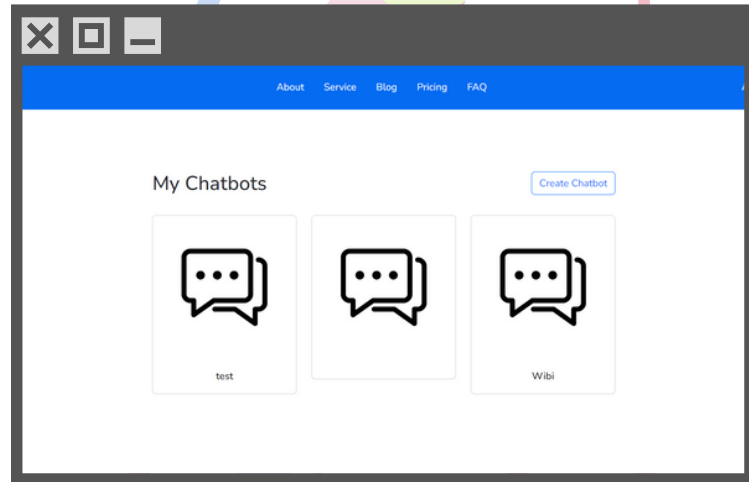

WHATSAPP CHATBOT

Customer Service

WhatsApp is a popular messaging platform used by billions of people worldwide. By offering customer service through WhatsApp, businesses can engage with customers on a platform they are already familiar with, increasing accessibility and convenience.
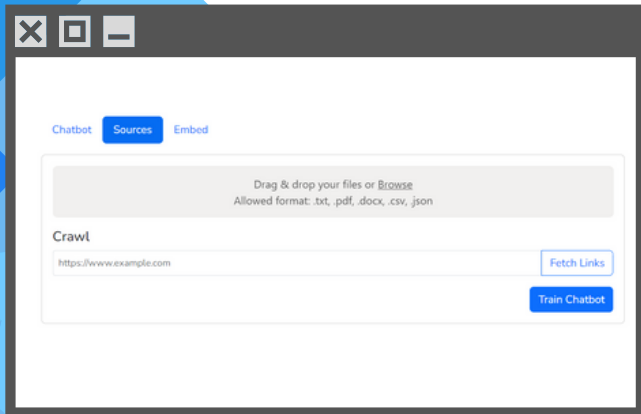

CHATBOT WEB

Train chatbot and embed into web

Training a chatbot is an iterative process, and it may take some time to fine-tune its performance and optimize its capabilities. Be patient and willing to adapt based on user feedback and evolving needs.

How to
Embedding Chatbot into Web

1 Gather Training Data
Upload data file into the area provided

2 Train Chatbot

Train your chatbot on this platform. Define its conversational flow, responses, and integrations with external systems if needed. Make sure it's capable of handling the queries and providing the assistance your website visitors might need.
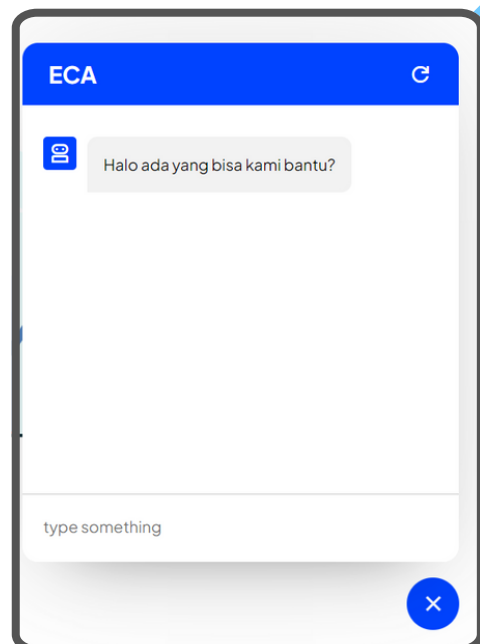

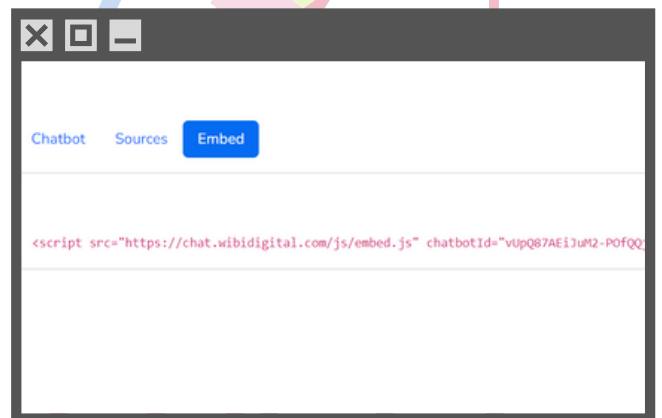

3 Get the embed code

On this platform, the embed code provided is in the form of JavaScript snippets that you can paste into HTML file.

```
<script src="https://chat.wibidigital.com/js/embed.js" chatbotId="vUpQ87AEiJuM2-POfQQ
```

**4** Open HTML file in your web and test your chatbot

Once you've embedded the chatbot into your website, test it thoroughly to ensure it's functioning correctly. Test various scenarios and interactions to make sure the chatbot responds appropriately to user inputs.

By following these steps, you can successfully embed a chatbot into your website and provide visitors with convenient access to assistance and information.

Why Choose Us

Chatbots can provide round-the-clock assistance, ensuring that users can get help or information anytime they need it, without waiting for human support.
